SUMMARY

Full Stack Developer with hands-on experience building RAG-based AI applications, Flask/React web apps, and Chrome extensions. Built and shipped multiple production-style projects covering LangChain, vector databases, and REST API integration. Currently pursuing B.Tech in Computer Engineering.

EXPERIENCES

Freelance Frontend Developer

Self Employed

Jan 2024 – Present

Indore

- Built a responsive clothing e-commerce site with **mobile-first design**, improving page load performance through image and asset optimization.
- Delivered additional freelance client websites, including responsive landing pages with **lead-capture forms** and **payment integration**, across multiple business domains.
- Delivered the project across **multiple revision cycles** based on client feedback, maintaining full design consistency across all pages.
- Ensured **cross-browser compatibility**, testing across Chrome, Firefox, and Safari to eliminate rendering issues.

SKILLS

Languages: Python, JavaScript, Java, C++, SQL

AI/ML: LangChain, LangGraph, RAG, OpenAI API, Hugging Face, Vector Databases, Prompt Engineering

Web Dev: React.js, Node.js, Flask, Django, HTML, CSS, Tailwind CSS, REST APIs

Tools: Git, GitHub, MySQL, MongoDB, Docker, Linux

EDUCATIONS

Bachelor of Technology

Swami Vivekanand College of Engineering
Computer Science Engineering

2023–2027

Indore

GPA: 6.7

PROJECTS

DocMind – RAG-based Conversational AI

2026

Built a full-stack RAG application enabling users to upload PDFs and query them via natural language, using **LangChain** and a vector database for retrieval and **OpenAI API** for response generation.

Python · Flask · LangChain · Vector DB · OpenAI API · React.js

Reflekt AI – AI-Powered Chrome Extension for Prompt Engineering

2026

Developed a Chrome Extension that converts multilingual, unstructured inputs into **optimized AI prompts** and generates **Context Capsules** to preserve key information across AI interactions.

JavaScript · Chrome Extensions MV3 · Google SDK · HTML · CSS

COSMO – Voice-Controlled Desktop Assistant

2025

Built a Python-based voice-controlled desktop assistant featuring **wake-word activation**, **face recognition authentication** with password fallback, and natural voice command processing for browser, media, and system-level task automation.

Python · OpenCV · Face Recognition · SpeechRecognition · pyttsx3

Morphy – Telegram-Based Automation Assistant

2025

Built a modular **Python automation bot** using the Telegram API for personal task automation, including **file organization**, **system monitoring dashboards**, and an extensible **plugin-based architecture**.

Python · Telegram API · OpenCV · asyncio

CERTIFICATES

Full Stack AI with Python – Udemy | Python & Flask for AI – Udemy

Artificial Intelligence Fundamentals – IBM SkillsBuild | Java Programming – Universal Informatics

Frontend Bootcamp – GDSC

ACHIEVEMENTS

Placement Coordinator

2026

Coordinated campus recruitment activities and facilitated communication between students, recruiters, and the placement cell to ensure **smooth placement processes**.

Web Development Lead

2025

Co-led the development and deployment of the **official website** for a college technical event, ensuring a seamless experience for **participants and organizers**.
